

Flood Update

Chippewa River Update

Monday, June 6, 2016, 11:00 a.m.

At 9:00 a.m. this morning, the Chippewa River gauge at Grand Avenue read 766.2, which is approximately seven (7) feet below the downtown flood stage of elevation 773. Lower sections of the Chippewa River Trail in the city of Eau Claire are currently closed.

Recent rains in the upper Chippewa River watershed will result in additional runoff passing through the system. Rain in the forecast will likely result in rising river gauge readings on the Chippewa River in Eau Claire.

The current crest projection is 768 for Tuesday evening. At the projected gauge reading, water will have inundated the Chippewa River Trail at Hobbs Boat Landing, the trail behind the Haas Fine Arts Center, near the UW-Eau Claire Foot Bridge, and may inundate the trail underpass at Madison Street and the Hobbs Landing parking lot. Lower areas of Owen Park will also flood. Lower areas in Riverview Park may also see water. Additional rainfall in the upper watershed or operational releases from upstream hydroelectric facilities could modify the crest projections.

Flood waters can generate stronger faster currents. Extreme caution should be exercised by persons using the rivers for boating, canoeing, kayaking, shore-side fishing, tubing, swimming, wading, or activities near the water. Hazards involving high water levels, strong currents, floating or submerged wood debris or trees, and obscured pilings are present on the Chippewa River.

The City will continue to monitor the river closely and report information as it is obtained. Residents along or near the river are also asked to monitor nearby river conditions in order to have as much advanced warning of those changes. Information is available on the City web site at www.eauclairewi.gov and on the Public Works Message Line at (715) 839-6002. For further information about this news release or river elevations, please contact the City of Eau Claire, Department of Public Works at (715) 839-4934.
