Eau Claire Fire & Rescue

News Media Report

Narrative:

At 8:53 the Eau Claire Fire and Rescue Department was dispatched to a structure fire in a home on Eau Claire's north side. We arrived to find smoke coming from the attic.

All of the occupants were out of the home when we arrived. Engine 10 was the first on scene and the officer quickly assessed the situation and called for a fire line. First in crew found a smoldering fire in the attic and were able to extinguish the fire with minimal water. With the use of the thermal imaging camera they were able to locate all hot spots and remove insulation as needed.

After the initial fire attack, crews were kept busy ventilating with positive pressure fans, and pulling ceilings to remove burning insulation.

Fire was placed under control at 9:20. Additional fire ground activities continued for the next hour.

Damage to the home is estimated at \$10,000.00. There were no injuries to occupants or firefighters.

Cause of the fire is electrical in nature.
