## **Food Temperature Log**

Wisconsin food safety regulations require the following:

Cold-hold/receiving: 41°F or below

Cook temperatures: poultry 165°F; ground meats and game meat 155°F; fish, eggs, pork, lamb 145°F

Date	Food Item	Time	Temperature	Corrective Action	Employee Name

Corrective Actions: dispose of food, move food to other units, rapidly cool food to 41°F, reject shipment, contact refrigeration maintenance company for repair Foods that may have been between 41°F and 135°F for over 4 hours must be discarded!

## **Cooling and Cold-Holding Checklists**

**COOLING** means **reducing** food temperatures to 41°F. **COLD HOLDING** means **keeping** food at 41°F or below.

Use these checklists to ensure food is cooled and maintained at proper temperatures

REFRIGERATION UNITS	COLD-TOP	CHECKING TEMPS
Make sure:	Make sure:	Make sure:
□ Door gaskets are in good condition	☐ Food is stored in metal containers	☐ Calibrate thermometers every day
<ul> <li>All doors close tightly (including self- closing doors)</li> </ul>	<ul> <li>Food containers are covered with metal lids or an ice blanket</li> </ul>	☐ Check food temperatures at least every 3 hours
		<ul> <li>Check food temperatures every hour</li> </ul>
<ul> <li>All food is stored in a way that allows for adequate air circulation</li> </ul>	<ul> <li>Food is stored at or below the fill line in the cold containers/inserts</li> </ul>	during the cooling process
·	·	☐ Regularly check equipment temperatures
□ Incoming cold air is not blocked by	□ Food stored in cold tops and reach-ins is	
pans, plastics, etc	41°F or colder	<ul> <li>Teach all food workers how to check and record food temperatures and have</li> </ul>
□ Food is not covered while cooling	☐ Lid is closed during slower service times	them share in the responsibility
ICE BATH COLD HOLD	OTHER COLD HOLD TIPS	MAINTENANCE
Make sure:	Make sure:	Make sure:
□ All food is completely submerged in the ice	<ul> <li>Place cold-top foods in the freezer 15 minutes before placing them on top of</li> </ul>	☐ Calibrate thermometers every day
	cold prep cooler	☐ Keep condenser coils, fans, and motors
□ A large container is used to make sure		clean and free of debris
ice water keeps all sides of food cold	<ul> <li>Cool foods in ice baths before putting</li> </ul>	
	them in refrigeration units; cooling hot	<ul> <li>Conduct maintenance on condensers at</li> </ul>
□ Ice is replaced as needed	foods in refrigerators can be hard on	least once every month
