13.04.010 Installation of sidewalks--General. This chapter is adopted pursuant to the authority provided in Wis. Stats. 66.615(7). Subject to other provisions of this chapter, sidewalks shall be constructed as follows:

A. Within new subdivisions, as provided in Section 17.12.280 of this code. The provisions of s. 13.04.020, entitled "Deferral of sidewalk construction," and s. 13.04.025, entitled "Procedures for deferral of sidewalk construction," shall not apply to this subsection A. for the construction of sidewalks within new subdivisions.

B. Abutting any lot described on a certified survey map under Wis. Stats. s. 236.34, or any other unplatted lot, at the time when the main building on the lot is initially constructed or when it is entirely reconstructed or replaced. Prior to issuance of a building permit for such construction, reconstruction or replacement, the property owner shall execute and file with the city Administrator of Inspections and Zoning a written document certifying installation of a public sidewalk abutting such lot or execute a petition to the city for such installation and the levy of special assessments in connection therewith and waiving notice and hearing pursuant to Wis. Stats. s. 66.60 (18).

C. Along streets lying within one-half mile of a public or private elementary or secondary school;

D. Along any street or portion of street which is classified by the city council as a collector street or arterial street under the functional street classification system of the city;

E. Where the installation of a sidewalk will connect previously constructed and existing sidewalks within the immediate area;

F. When property owners who own over one-half of the frontage along a street file a petition with the city requesting that sidewalks be installed along such frontage; and

G. At such other locations where the city council determines that one or more of the following conditions exist:

1. Vehicular and pedestrian conflicts present a potential danger to the health and safety of persons; or
2. The number of small children, senior citizens or other persons having special needs reside on a street and require a sidewalk to assure their safety; or
3. Parks, playgrounds or other locations exist which are attractive to large numbers of children and are not served by sidewalks thereby resulting in an immediate danger to the health and safety of such children. (Ord. 6285 §1, 2002; Ord. 4510 §1, 1984).

13.04.020 Deferral of sidewalk construction. Sidewalk shall be constructed in all locations as outlined in section 13.04.010, except the city council retains the authority to review any sidewalk proposal and to designate procedures to defer the construction thereof whenever it is deemed necessary and desirable. A deferral shall not constitute a permanent waiver of sidewalk construction, and the city council may review and reconsider the need for construction at any time. Sidewalk construction may be deferred in the following situations:

- A. Where the construction would be along a cemetery, outlying industrial property, or in any other area where little or no pedestrian use is reasonably anticipated;
- B. Where the owner of the property adjacent to the street elects to provide an alternative pedestrian facility which is acceptable and approved;
- C. When it is determined that the construction of sidewalk is not feasible or practical due to topographical or other physical constraints; or
- D. When it is found that construction of sidewalk would not serve the public interest, safety or convenience. (Ord. 4981, 1989; Ord. 4510 §2, 1984).

13.04.025 Procedures for deferral of sidewalk construction. All requests for deferral of sidewalk construction shall be submitted in writing to the department of engineering. Applications for deferral of sidewalk construction shall be processed as follows:

- A. The director of engineering or their designee is authorized to approve the deferral of sidewalk construction under the following circumstances:
 - 1. Where the location is on a cul-de-sac or dead-end street of 750 feet or less in length and no other sidewalk exists on the cul-de-sac or dead-end street segment;
 - 2. Where development is substantially complete in the area and no other sidewalk exists on the street segment;
 - 3. Where the location is a remote rural area and no sidewalk exists or is planned to be constructed in the near future;
 - 4. In locations where the city has programmed or scheduled street construction as part of the capital improvement program; or
 - 5. Where topography, street grades or physical constraints make the construction impractical.
- B. Decisions rendered by the director of engineering or their designee may be appealed by the applicant to the city council for consideration and determination by the council.
- C. All applications for deferral of sidewalk construction for reasons not included in subsection 13.04.025 A. shall be submitted to the city council for review, consideration and determination.
- D. Locations where construction of sidewalk is deferred shall be subject to the following conditions:
 - 1. A concrete sidewalk section shall be constructed at the time the driveway is constructed in the location and at an elevation established by the department of engineering which is calculated to accommodate a possible future sidewalk in the location.
 - 2. The terrace and yard area shall be graded to meet a possible future sidewalk in the location and elevation established by the department of engineering. This subsection shall not apply where sidewalk construction is not practical for topographic reasons. (Ord. 7202, 2016; Ord. 4981, 1989).

13.04.030 Design and construction of sidewalks. A. Sidewalks shall be constructed in accordance with city specifications as established by the department of engineering. Subject to the provisions of subsection B, and unless as otherwise directed by the director of engineering or their designee, the width of all sidewalks in residential areas shall be 5 feet. The sidewalk width in all other areas shall be established by the director of engineering or their designee.

B. The design of sidewalks shall be flexible and shall be adapted to suit the particular needs of the area within which they are constructed. The materials used and designs employed in connection with sidewalk construction shall be consistent with topography and aesthetics. Trees shall not be removed in order to construct sidewalks unless their removal is reasonably necessary in order to accommodate such construction, as determined by the director of engineering or their designee. If a boulevard exists, as much space as possible shall be retained on it to provide for the storage of snow. (Ord. 7202, 2016; Ord. 4510 §1, 1984).

Detour routes shall be approved by the department before a permit is granted. All barricades and detour signs shall be furnished and maintained by the contractor or utility company. If the city is required to establish the detour route, provide signing or traffic control measures, the cost of such services provided shall be billed to the contractor or utility company.

"In-kind replacement" shall mean a structure that serves the same purpose as, is the same or similar in size as, and does not further or create a nuisance on or within the right-of-way than the structure it is intended to replace.

A. All structures shall be located such that the height of the structure plus an additional 10 feet exists between the structure and any habitable building.

I. If the structure is in the form of a tower or pole that is greater than 10 feet taller than existing poles or tower in nearby right-of-way, the applicant must submit evidence sufficient to demonstrate that:

1. the greater height is required to accomplish the applicant's purposes;

2. the applicant is prohibited from using existing poles or towers, whether owned by applicant or a third party, to accomplish its purposes because such use is technically infeasible, economically prohibitive or prohibited by law; and

3. the pole or tower, due to its height and size, poses no greater danger to the health, safety, and welfare of the public than existing poles in nearby right-of-way.

J. All structures placed on streets classified as collectors or locals, as defined by the West Central Wisconsin Regional Planning Commission, shall be 40 feet or less in height.

K. All structures shall be located so as to not be contrary to public health, safety or welfare. (Ord. 7225, 2017)

(Ord. 5130, 1991).

13.10.090 Emergency excavation authorized. In the event of an actual, bona fide emergency, any person owning or controlling any sewer, water main, conduit or utility in or under any street or alley, or such person's agents or employees, may take immediate, appropriate emergency measures to remedy conditions endangering property, life, health or safety without obtaining a permit under this chapter. Such person shall apply for an excavation permit not later than the end of the next working day following the undertaking of such measures. (Ord. 5130, 1991).

13.10.100 Settlement of pavement and surfacing. Regardless of who installed the same, the permittee shall be responsible for the cost of replacement and restoring the grade of pavement or surfacing which has settled within 2 years from the date of completion of backfilling. If following notice thereof by the city, the permittee fails to replace the inferior work, the city shall perform the work and charge the permittee for the actual costs thereof, plus an administrative charge as stated in the City of Eau Claire Fees and Licenses Schedule. Each successive replacement by the permittee shall be subject to the requirements of this section. (Ord. 6363 §33, 2002; Ord. 5130, 1991).

1. That there exists a need for outdoor eating facilities in certain areas of the city to provide a unique environment for relaxation, social interaction, and food consumption.

2. That sidewalk cafes will permit enhanced use of the available public rights of way, will complement the restaurants operating from fixed premises, and will promote economic activity in an area.

3. That the existence of sidewalk cafes encourages additional pedestrian traffic and their presence may impede the free and safe flow of pedestrians. Therefore, a need exists for regulations and standards for the existence and operation of sidewalk cafes to ensure a safe environment.

4. That the establishment of permit conditions and safety standards for sidewalk cafes is necessary to protect and promote public health, safety, and welfare.
