

Annual Report

City of Eau Claire

City Manager: Russell Van Gompel

City Council:

The City Council enacts legislation and allocates City resources for programs, services and activities. The Eau Claire Police Department sincerely appreciates the support of the Eau Claire City Council.

Kerry Kincaid, *President*
David L. Duax, *Vice President (District 1)*
David Klinkhammer *(District 2)*
Kathy Mitchell *(District 3)*
Bob Von Haden *(District 4)*
Andrew Werthmann *(District 5)*
Catherine Emmanuelle
Eric Larsen
Monica Lewis
David Strobel
Michael Xiong

Police and Fire Commission:

The Police and Fire Commission is a non-political board of citizens appointed by the City Council. They oversee personnel matters, including the hiring and discipline of sworn staff members, consistent with Wisconsin State Statute 62.13. We appreciate that these Commission members volunteer their time and services to the community of Eau Claire.

Keith Glasshof, *President*
Dennis Pope, *Vice President*
Jill Barland
Terry Sheridan
Daniel Kincaid

2013

Officers Vonderheid and Theis

Patrol Division

Deputy Chief Chad Hoyord

The Patrol Division operates under a geographical structure that divides the city into three separate districts. Within each of these districts, we have patrol beats to focus on specific neighborhoods. Each Patrol Officer is assigned a specific beat on a yearly basis so they can develop a connection with the residents and partner with them to solve problems. We identified the boundaries of our districts and beats based upon multiple factors to include different neighborhoods, business areas, schools and calls for service.

The Eau Claire Police Department’s Patrol Division is comprised of 54 patrol officers, one Patrol Investigator, nine Sergeants, three District Commanders and one Deputy Chief. The Patrol Division is also supplemented with a Special Operations Section (SOS) consisting of four officers and one Sergeant who concentrate on quality of life issues in our community. In addition, 12 civilian Community Service Officers (CSOs) are responsible for duties including parking control, animal-related issues and fingerprinting services.

Our department is dedicated to making sure officers receive continued education and keeping current with changes and trends in our society. Just as important, we strive to keep the community informed of changes as we partner together to keep our community safe.

The Patrol Division is an integral part of the department’s philosophy on Problem-Oriented Policing. In 2006, we initiated a transformation on how we police our community. Since then, we have seen some tremendous success on partnering with our community to identify issues and working together to solve problems. I would like to take a moment and highlight some of the Problem-Oriented Policing Projects various patrol districts worked on in 2013.

These successful projects mentioned below were made possible because of the support, collaboration and hard work by our community as a whole and the men and women who work the Patrol Division.

North District

The North Crossing near Riverview Drive surfaced as a speed problem area. Officers of the North District analyzed data and spent time conducting speed enforcement in this area. In addition, there have been conversations with the Department of Transportation to add an emergency “turn around” in the median along the North Crossing to allow emergency vehicles to respond in both directions more efficiently.

The North District is also working with North High School to help monitor student activity in Riverview Park during the lunch hour. This type of collaboration has reduced the number of complaints of misconduct by students in the park .

Detective Division

Acting Deputy Chief Matt Rokus

The Eau Claire Police Department Detective Division is comprised of 16 detectives supervised by three Sergeants, one Lieutenant and one Deputy Chief.

In 2013 the Detective Division led several initiatives aimed at crime prevention and further developed partnerships with other organizations. Detective Division staff researched the impact pawnshops and second hand property dealers were having on local crime rates. It was determined pawnshops and second hand dealers have outgrown the city's current ability to identify the criminal activity related to them. As a result of this analysis, beginning in 2014 the Detective Division will have one detective assigned full-time to ensure pawnshops comply with local ordinance and to prevent the transfer of stolen property at local businesses.

Also in 2013, Eau Claire Police Department Detectives worked with investigators from the Eau Claire County Sheriff's Office, Wisconsin Department of Justice – Division of Criminal Investigation and Chippewa Valley Regional Computer Forensic Laboratory in an effort to stop human trafficking in our area. The partnership included two joint operations that led to the arrest of sixteen men involved in human trafficking in the Chippewa Valley.

Cases that are referred to the Detective Division are reviewed and prioritized. Follow-up assignments are made based on the nature of the crime, the presence of potential leads and the current caseload. The division supervisors review approximately 14,000 cases each year. 1,470 cases were assigned for follow-up investigation in 2013. 1,223 of those investigations led to a successful conclusion, resulting in an 83% clearance rate for cases that were assigned to a detective. Case assignments are made based on the type of crime being investigated.

General Crimes

Three detectives are responsible for investigating crimes against persons, such as robbery, homicide, battery, sexual assault and property crimes such as burglary, theft and criminal damage. One General Crimes Detective is also involved in processing and preserving evidence as well as coordinating evidence transmittals to crime laboratories in the State of Wisconsin and at the Federal Bureau of Investigation.

Financial Crimes

Two detectives are responsible for investigating crimes such as fraud, forgery, embezzlement, internal theft, counterfeiting, identity theft and a wide variety of scams where the victims are targeted for their financial assets.

continued

Sensitive Crimes

Two detectives are responsible for investigating cases involving child victims of abuse, neglect, sexual assault and child pornography or child enticement. Additionally, these detectives work extensively with the Department of Human Services, local school districts and other social service organizations to ensure child victims have the proper support and services available to them.

Police School Liaison Officers

Four detectives are assigned to the five secondary public schools in Eau Claire. These liaison officers are responsible for investigating juvenile crime, crimes against children, counseling and mentoring students and conducting educational presentations in the schools. These officers also commonly work with other detectives on investigations.

West Central Drug Task Force

One Sergeant and two detectives are assigned to this task force in order to assist in the investigation of illicit drug activity in the Chippewa Valley. The task force is comprised of investigators from several law enforcement agencies in the area. For over 20 years, this regional collaboration has proven to be a very effective approach for disrupting and dismantling regional drug trafficking organizations.

Digital Forensic Examiner

Due to the rapid increase of use of computers and other electronic devices to facilitate crime, there is a need to examine digital evidence. Digital evidence is most commonly discovered during investigations of child pornography, child enticement, drug trafficking, financial crimes, and has been critical in homicide investigations.

The Eau Claire Police Department is the lead agency in the Chippewa Valley Regional Computer Forensic Laboratory. There is one full time and four part time investigators from three different law enforcement agencies working cooperatively together to analyze computer devices.

Polygraph Services

One detective administers polygraph examinations to assist other detectives verify the truthfulness of potential suspects. These examinations are conducted for both our agency and other agencies in the area. Additionally, this detective administers polygraph examinations as part of our department's pre-employment screening process for new police officers.

Administrative Services

Director Kristin Southard

The Eau Claire Police Department's Administrative Services Division is comprised of the Court Services, Records and Property and Evidence sections. The Director of Administration oversees these sections and is also responsible for managing the police department's multi-million dollar budget, applying for and managing grants on federal, state and local levels and oversees and helps to implement all types of major technology projects being pursued by the department.

Records Section

The Records Section of the Eau Claire Police Department is comprised of one full-time Records Bureau Technician, seven full-time Law Enforcement Support Assistants (LESAs), and one part-time typist.

In January 2013, as part of the major courthouse remodeling project, the Eau Claire Police Department Records Section moved to a shared space area along with records personnel from the Eau Claire County Sheriff's Office records. Although both agencies continue to maintain separate records for their departments, the centralized location provides opportunity for some shared responsibilities at the law enforcement services windows and the public is afforded convenient access for services from either law enforcement agency records section when needed.

One of the major job duties of Records Section personnel is to respond to the public's open record requests. Personnel receive specific training in this area due to the number and complexity of Wisconsin State Statutes governing these requests. The major duties of the Records Section are to:

- Handle the receipt, verification and entry of data for all police incident reports, accident reports, arrest records, traffic citations and ordinance arrests as well as the scanning of any paper documents related to these areas.
- Maintain criminal information records related to fingerprints and mug shots.
- Provide information to other agencies who work directly with the department such as the District Attorney's Office, Probation and Parole and the Department of Human Services.
- Serve as the first-line representatives of the department for all inquiries by citizens for police-related information regarding documents, photographs, interviews or videos.
- Serve as the central resource for others within the department seeking records or information necessary for the completion of their activities.

continued

Records Section personnel are also responsible for managing the following types of records:

- All incident reports and narratives
- Photographs
- Arrest records
- Juvenile referrals
- Ordinance and traffic citations
- Written warnings
- Mug shots
- Accident Reports
- Digital audio and video recordings
- Squad car videos
- Fingerprint records

Due to advances in technology, these types of records are done almost entirely in electronic or digital format. The few paper documents that are received are electronically scanned upon receipt, stored with their related file and then shredded for disposal. Records personnel have knowledge regarding the use of computer hardware and numerous software programs such as document imaging, digital mug shots, digital recorders, digital narrative transcription, digital photographs and Live Scan fingerprinting. These programs make the paperless atmosphere a reality.

The department generates tens of thousands of records each and every year. Present Wisconsin state law requires that all records created by the department (unless a specific waiver has been applied for and granted by the State) be maintained for potential public records requests for a minimum of seven years.

Property and Evidence Section

The Property and Evidence Technicians have always been responsible for the secure storage of evidence that is turned in, collected or seized by the Eau Claire Police Department. However, in 2013 as part of a joint services agreement, the department took on these same responsibilities for the property and evidence of the Eau Claire County Sheriff's Office as well. As part of a major space remodeling project, the separate property rooms were merged and moved into a new area equipped with state-of-the-art monitored electronic access, pass-thru evidence lockers, moving storage shelving, vented drug room and secured gun storage area.

Evidentiary items come to the department from criminal cases and consist of everything from the smallest DNA samples to large vehicles as well as illegal drugs, guns and currency. Items that are turned in as found (wallets, purses, keys, etc.) or items which are reported as abandoned (mainly bicycles) are considered property also stored in this area. Technicians work closely with the Eau Claire County District Attorney's Office, the Chippewa County District Attorney's Office and the United States Attorney General's Office regarding the chain of evidence needed to ensure a successful prosecution. The technicians also coordinate with other law enforcement agencies that have collected evidence related to their cases from various locations within the City of Eau Claire.

continued

The technicians are responsible for the appropriate disposal of all property and evidence collected. Depending upon the type of item it is disposed of in one of the following ways:

- Returned to owner
- Sent to other agencies
- Held by the court
- Destroyed either by the Eau Claire Police Department or by the State Crime Laboratory
- Sold through auction at PropertyRoom.com

Court Services

The Court Officer serves numerous essential functions. The officer is a liaison between the Police Department and offices of the Eau Claire County District Attorney, Juvenile Intake, Corporation Counsel, Clerk of Courts, City Attorney, State Lab of Hygiene and other area law enforcement agencies. This officer is also the representative of the Police Department for citizens who have questions or concerns about citations they have received and/or procedures that must be followed to properly dispose of their citations.

The Court Officer assists the City Attorney's Office by coordinating all initial appearances in traffic and ordinance court. Additionally, the Court Officer assists the attorneys with pre-trial conferences, coordinates witnesses for trials in the court, and is also responsible for documenting all court-related dispositions. When changes in law, statutes, or operating procedures occur, the Court Officer advises all personnel affected by the revisions.

The following statistics reflect the 2013 forfeiture, traffic and ordinance citations that are handled by the City of Eau Claire. Citations issued for, or in conjunction with, criminal charges are not included, as these citations are handled by the Eau Claire County District Attorney's Office.

When reviewing the accompanying data regarding citations and their disposition, please understand that the numbers are approximate. Figures are kept per calendar year and are based on records at each phase of the citation and prosecution process. Cases are not individually tracked to allow adjustment for those that cross calendar years, therefore citations issued in one year may receive a pretrial in the following year, or a case pretried in one year may be set for trial a couple of months later, wrapping into the next year and thereby affecting a single year's totals.

Communication Center

Director Greg Wallace

The Eau Claire Emergency Communication Center is one of the oldest combined 9-1-1 centers in the state. Since 1970, the center has been the central dispatch point for police, fire and emergency medical services in Eau Claire County. A civilian staff of 18 telecommunicators, three supervisors and a director serves 14 agencies in Eau Claire County.

In 2013 a new narrowband radio system was implemented. This new system not only upgraded outdated radio equipment but also brought the entire county into compliance with the Federal Communications Commission's requirements for public safety radio equipment. The new system has, for the most part, improved radio communications in Eau Claire County. One of those improvements allows for Communication Center staff to identify the specific radio that is currently broadcasting. This provides additional safety to emergency service personnel in the field.

Communication Center staff is charged with answering all emergency and non-emergency calls for service throughout Eau Claire County. In 2013 alone, 112,782 Computer Aided Dispatch incidents were tracked, 72,745 emergency phone calls were received and 169,308 non-emergency calls were received. These numbers do not reflect outgoing phone calls or the many incoming and outgoing radio transmissions.

As technology evolves, so must our center. In the very near future, 9-1-1 centers will be expected to take calls for service via text message, in addition to receiving video and photos. All of these changes currently are not funded. Access to 9-1-1 will be from many new technologies. We have evolved in the years from simply sending officers out to calls, to now checking many databases while the officers are in the process of responding to these calls for service. This information is pushed out to the officers by both voice communication and mobile computer. While the overall number of calls is lower than previous years, the Communication Center staff spends a great deal of time checking many different resources for responders to ensure safety and disseminate full and accurate information.

Enhanced 9-1-1 provides location information when using a traditional phone line; however, Cellular 9-1-1 calls have taken over as the largest segment of incoming emergency calls. Unfortunately these calls do not always provide accurate information on location. Often the public is calling under the assumption emergency services will automatically know their location. Voice Over Internet Protocol (VOIP) phones are more popular also and the information from those phones is only as good as what is on the phone account. The Communication Center staff has to be diligent with every call to ensure that proper locations are obtained. Technology has helped over the years but it has also provided ways to access the system with incorrect and, at times, intentionally false information.

continued

In 2013 the Communication Center was remodeled as part of the courthouse remodeling project. While this remodeling took place, the Communication Center temporarily relocated our full operation to a backup center without any interruption to the service we provide. In 2014 we will continue to enhance our ability to operate out of a backup facility.

Telecommunicators direct many different emergency resources to locations all over Eau Claire County while keeping track of many emergency service workers. The Communication Center staff is the first point of contact for callers in an emergency situation. Providing instructions that keep callers safe, giving basic life support in medical emergencies and calming situations that could escalate are everyday occurrences. It takes a special person who can work as an individual as well as part of a team to accomplish positive outcomes on the most critical emergencies.

Special Services Bureau

Lieutenant Jim Southworth

The Special Services Bureau is a branch of the Eau Claire Police Department staffed by the Lieutenant of Special Services, Community Relations Officer, Safety Education Officer, Training Technician, Crime Analyst and a grant funded Community Liaison position. The Special Services Bureau partners with area media, local elementary schools, after school programs and many other departments within the City to help facilitate services to our community.

Community Relations Officer

The Community Relations Officer for the Eau Claire Police Department serves as the public information officer and main point of contact and resource for the varied needs of the community. The Community Relations Officer is responsible for publicly representing the police department through news releases, press conferences, media interviews, social media, police officer recruiting events, public presentations and various other community engagements.

In 2013, the Community Relations Officer represented the Eau Claire Police Department at 37 community events, 14 educational community presentations and four career recruiting fairs. The Community Relations Officer also served as the police department's representative on various outside committees, attending over 80 meetings.

During National Police Week in May, the Community Relations Officer organized the "Heroes Behind the Badge" event that attracted more than 300 community members and raised over \$3,000 for the National Law Enforcement Officers Memorial Fund and Concerns of Police Survivors. Additionally, the Community Relations Officer co-organized the Northwest Wisconsin Regional Law Enforcement Memorial and Eau Claire's National Night Out event.

Throughout 2013, the Community Relations Officer actively marketed the Eau Claire Police Department. In May, through a partnership with Eau Claire Ford, the Eau Claire Police Department obtained a special Community Relations vehicle. This vehicle was used in multiple parades and numerous community events to engage the citizens of Eau Claire. Additionally, the Community Relations Officer reinvigorated the Eau Claire Police Department's Twitter account (@EauClairePD) by using it to broadcast police related events and safety tips to an ever-growing group of followers.

continued

Safety Education Officer

The Safety Education Officer is a valuable resource for Eau Claire’s school-age children. This officer educates youth on numerous safety and community issues including: bicycle safety, bus safety, pedestrian safety, home safety, personal safety, Internet safety and shoplifting awareness. The Safety Education Officer spends the majority of his time in elementary schools, not only to teach safety, but also to ensure that a young student’s first contact with law enforcement will be a positive experience. In 2013 the Safety Education Officer completed 145 presentations and was involved in 40 events throughout the community. The Safety Education Officer also met with individual children on a daily basis to promote positive decision making.

The Safety Education Officer continues to coordinate and oversee both the adult school crossing guards and the youth school safety patrollers. These programs provide staffing at hazardous intersections near schools.

The Safety Education Officer is also certified in child safety seat installations and participates in area safety fairs and other events to educate parents about the proper use of safety seats for their children. The Safety Education Officer also assists with parking ticket mediation, Court Officer duties, conducts department tours and gives presentations on specific topics dealing with safety and awareness in our community.

Training Technician

The Training Technician is responsible for coordinating training for all members of the Eau Claire Police Department. The Wisconsin Department of Justice Training and Standards Bureau requires that sworn officers complete 24 hours of training per year and the Training Technician helps facilitate this training.

The Training Technician is also the Department’s coordinator for the TIME System, which enables law enforcement agencies to access multiple Wisconsin data sources for information essential to police operations (driver and vehicle information, criminal history information, etc.). This system also provides an automated interface with the FBI's National Crime Information Center, which furnishes national criminal history record information.

Additional responsibilities of the Training Technician include the orientation of new employees as well as tracking and auditing the educational incentive program.

continued

Crime Analyst

The Crime Analyst continues to be an integral component of the Eau Claire Police Department. Utilizing data driven approaches, the Crime Analyst analyzes data in order to address crime and disorder problems affecting our community. The Crime Analyst also assists with various projects within the department.

The Crime Analyst regularly performs administrative, intelligence, operational, strategic and tactical analysis. Common tasks include data compilation, data collation, analysis, creating written and visual compositions as well as presentation of such materials. The Crime Analyst supports the operations of all divisions within the department.

In conjunction with other Wisconsin law enforcement agencies, the Crime Analyst worked on the development of a statewide law enforcement analyst network. The Crime Analyst, along with members of this network, planned and hosted the first statewide analyst conference in the fall of 2013.

Community Liaison

The Community Liaison is a non-sworn grant-funded position through the Eau Claire Hmong Mutual Assistance Association (ECHMAA) and acts as a liaison between the Hmong community and the Eau Claire Police Department. The Community Liaison provides assistance with language translation, expresses concerns on behalf of the Hmong community, and works closely with the Eau Claire Hmong Mutual Assistance Association to provide police services to area Hmong youth and families. The Eau Claire Police Department is pleased to continue this partnership with the ECHMAA.

Crash Reconstruction Team

The Crash Reconstruction Team exists to technically investigate fatal or serious injury motor vehicle crashes and to assist the Crime Scene Unit by forensically mapping major crime scenes.

The team consists of five officers who have received advanced training in mathematics, physics, evidence documentation and specialized equipment operation. In addition to ongoing schooling, members of the team meet on a quarterly basis for in-house training.

Crime Scene Unit

The forensic examination of physical evidence is a critical element in police efforts to conduct successful criminal investigations and subsequent prosecutions. The forensic science field is ever-changing with improvements in DNA analysis, new processes for developing latent fingerprints and innovations for documenting crime scenes. These scientific and technological breakthroughs have made it feasible to collect and analyze evidence that was never before thought possible.

The Eau Claire Police Department Crime Scene Unit consists of 25 police officers that have received additional training in the proper identification, collection, analysis and documentation of forensic evidence. The Crime Scene Unit regularly responds to major crime scenes such as death investigations, burglaries, robberies, sexual assaults and shootings.

In addition to responding to crime scenes, members of the Crime Scene Unit analyze physical evidence in a laboratory setting. In 2013 the Crime Scene Unit began utilizing a new forensic evidence laboratory that was constructed as part of the Law Enforcement Center renovation. The Eau Claire Police Department Crime Scene Unit shares this space with the Eau Claire County Sheriff's Office. This state-of-the-art evidence laboratory allows our organizations to employ Alternate Light Source (ALS) technology, advanced latent fingerprint identification techniques, advanced DNA collection methods and specialized photography.

Technological advancements make the ongoing training of evidence technicians more important than ever. Every year several members of the Crime Scene Unit attend training sponsored by the Wisconsin State Crime Laboratory, Wisconsin Department of Justice and other nationally recognized experts. This training is brought back to our community and shared with the remainder of the Eau Claire Police Department Crime Scene Unit and other regional law enforcement agencies.

Crisis Negotiation Team

The Eau Claire Police Department Crisis Negotiation Team is made up of select officers who, in addition to their regular duties, are trained to talk with suicidal persons, barricaded persons, or hostage takers in high-risk situations, with the goal of resolving situations peacefully. Although negotiation is the preferred method of resolution, the Crisis Negotiation Team also works closely with the Eau Claire Police Department's Tactical Response Team. The team is also supported by FBI Special Agent Dave Fitzgerald.

The Eau Claire Police Department Crisis Negotiation Team is comprised of 13 Crisis Negotiators with nearly 200 years of combined law enforcement experience. All members of the Crisis Negotiator Team have completed the Federal Bureau of Investigation's Basic Hostage Negotiation Training Program and many have completed additional specialized training programs.

Several members of the Crisis Negotiation Team have received training in the Memphis Model of Crisis Intervention Training. The Crisis Negotiation Team continues to train with Crisis Intervention topics to learn more about mental health and how to successfully work with these issues and better serve the community.

Members of the Crisis Negotiation Team meet quarterly for ongoing training. One of these quarterly training sessions is typically a large-scale scenario conducted with the Department's Tactical Response Team.

Firearms

The ongoing training of police officers in the usage of firearms is essential to public safety. Officers of the Eau Claire Police Department are required to successfully complete several shoots per year utilizing multiple service weapons. The goal of these shoots is to provide opportunities for officers to maintain proficiency in regard to their firearms related skills as well as their decision making tactics.

Force Options Team

The Force Options Team (FOT) is comprised of 15 sworn officers, both supervisory and non-supervisory. The team is tasked with training sworn department members in the areas of use of force as delineated and governed by the Defense and Arrest Tactics (DAAT) system. The Force Options Team trains officers in the techniques of use of force as well as through scenario based training. The team provides training for probationary employees at scheduled intervals throughout the officer's first year of employment and conducts skills and scenario training for our entire department during our annual in-service.

Gang Intelligence Unit

The Gang Intelligence Unit is comprised of 11 officers. Each officer has been trained to detect gang activity and membership, and each specializes in knowledge of a particular gang. Gang Intelligence Unit members also attend gang conferences and seminars. Members of this unit maintain a network with other departments within Wisconsin as well as other states with an ultimate goal of reducing crime related to illegal gang activity.

Honor Guard

The Honor Guard represents the Eau Claire Police Department in a positive and professional manner at law enforcement, public and private ceremonial events. During monthly trainings, Honor Guard members practice basic movements, various forms of group marching, flag folding, rifle salutes, casket carrying and funeral preparations.

This year, the Eau Claire Police Department Honor Guard participated in 15 events which included presenting the colors at the start of a Milwaukee Brewer's baseball game at Miller Park in Milwaukee, which has become an annual event. Honor Guard member Officer Terry Nicks became a regional representative for the Wisconsin Honor Guard Association and will help coordinate Honor Guard units in this area of the state to assist departments that may have an officer funeral. Officers Jentzsch, Erickson and Bjorkman joined the team in 2013 due to the retirement or resignation of previous members.

K-9 Unit

The Eau Claire Police Department currently has one K-9 Unit consisting of Officer Jason Ruppert and K-9 Duke. Duke is a Belgian Malinois that is trained for dual purposes. Duke has been trained to detect illegal drugs such as marijuana, cocaine, crack, heroine and methamphetamines. He has also been trained to track suspects that flee from a crime scene. Duke can be sent into buildings to locate suspects and he is also trained to apprehend fleeing dangerous felons. Duke, like most other K-9s, will also protect his handler if the handler is attacked. This K9Unit also trains with the department’s Tactical Response Team to assist them on deployments. The dog lives with his handler, which allows them to both work and train together.

The K-9 Unit’s primary mission is to support the patrol division in assisting with drug interdiction and locating suspects that have fled a crime scene. The K-9 Unit will also assist at alarms, fights and on traffic stops. When not supporting the Patrol Division, the K-9 Unit can be called upon to assist other departments in drug and suspect searches. Just a short list of agencies that the K-9 Unit has assisted is:

- West Central Drug Task Force
- Eau Claire County Sheriff’s Office
- Wisconsin State Patrol
- University of Wisconsin—Eau Claire Police Department

The K-9 Unit has also been called to assist area school districts to include Eau Claire, Chippewa, Bloomer, and the Eau Claire Academy in conducting drug searches of their campuses. These searches have been a great deterrent to subjects in keeping drugs away from area schools.

The K-9 Team will also assist our Special Services Bureau in conducting presentations to area schools and civic groups that want to learn more about the team and department.

Police Chaplaincy Program

Since its inception in 1998, the Eau Claire Police Chaplains have volunteered to serve and partner with the officers of the Eau Claire Police Department. They are a resource to officers who, in the course of their duties, encounter persons in crisis. They also serve as a resource to those in our community whose lives have been broken by violence or tragedy.

Chaplains provide the following services:

- Assisting officers with death notification
- Assisting with homicides and suicides, fatal or serious injury crashes and other critical incidents
- Serving as a resource for personal issues of Department personnel

The Chaplains meet monthly for ongoing training and have a rotating on-call schedule, making them available on a 24-hour basis. Chaplains are also encouraged to participate in the life of the Department; being part of the happy times and being present during times of tragedy. The Chaplains also generously hosted the eighth annual Holiday Gathering for Police Department personnel and their families.

Mission Statement:

Spiritual care is offered to every officer and citizen, especially in times of crisis, through a ministry of presence, service and compassion.

Core Values:

The Core Values of the Police Chaplaincy program include: ministry of presence, spiritual support, leadership, commitment to quality and pursuit of excellence through professional growth and development.

Police Training Officer Program

The field-training of newly hired police officers is a critical function performed by members of the Eau Claire Police Department's Police Training Officer (PTO) program. The PTO program is comprised of 23 officers and 11 supervisors who are dedicated to the mentoring and development of new officers. The skills and resources that new officers develop during this program lay the foundation for their careers.

The PTO training model was developed by the United States Department of Justice to complement problem-oriented policing and community-oriented policing philosophies. The PTO program utilizes problem-based learning as the primary instructional method with an emphasis on adult learning strategies, critical thinking and development of problem solving skills. The program encourages new officers to explore non-traditional problem solving strategies and community resources in their efforts to reduce crime and disorder.

A newly hired officer begins the PTO program after completing his or her recruit academy training. During the 15 week program, the new officer is observed by multiple training officers and works a variety of shifts and beats. The program focuses on 16 core competencies that include conflict resolution, use of force, leadership, officer safety, communication skills and legal procedures. As the training program progresses, the learning objectives for the new officer become more challenging. New officers are evaluated by their training officers using a variety of methods and must consistently evaluate their own progress as well.

During a new officer's training program he or she must also identify a community problem and develop a plan to address the problem. At the conclusion of the training program, the new officer presents his or her project to a panel that includes the Chief of Police. Officers who have completed this training program have implemented plans that have reduced crime in specific neighborhoods and parks, prevented crime and disorder, decreased vehicle crashes at targeted intersections and improved traffic safety in a school safety zone.

The Police Training Officer Program supports the Eau Claire Police Department's mission and problem solving efforts. Since its inception in 2006, 33 officers have completed the PTO program. The efforts, dedication and skill of the training officers ensure that new officers have quality training as they embark on their careers to enhance the quality of life in our community.

Tactical Response Team

Certain events in the community require a response that incorporates specialized skills and equipment. In cases of high-risk warrant service, barricaded suspects or hostage rescues, the Eau Claire Police Department Tactical Response Team serves the department and community through the application of specialized training and tactics. The Tactical Response Team is committed to serving the department and community through the safe resolution of high-risk incidents.

The Eau Claire Police Department's Tactical Response Team was formed in 1991 and is comprised of 25 members, all of whom have other full-time assignments within the department. Members of the team participate in monthly trainings that include tactics, firearms and physical fitness. The evolution of crimes and community needs makes ongoing training a priority for the team.

Whether in training or at actual events, the officers of the Tactical Response Team take their role as tactical operators very seriously. The team is proud to offer the citizens of Eau Claire the protection of an experienced and well-supported tactical team.

Technical Services Unit

The Technical Services Unit provides technical and analytical assistance to all facets of the Eau Claire Police Department for the purpose of criminal investigation, criminal prosecution and crime prevention, thereby increasing the overall effectiveness of the Eau Claire Police Department and helping to improve the quality of life for the citizens of Eau Claire.

This specialized group of individuals who have other full-time assignments within the department utilizes some of the latest electronic tools and technology available to gather information and evidence that will assist members of the police department. Several of the tools and techniques utilized may also add a degree of officer safety to an officer's job performance in many circumstances.

Aided by tools and technology, the Technical Services Unit is committed to the disruption, prosecution and prevention of criminal activity in Eau Claire. With added diversification and specialization of team members, the Technical Services Unit aims to continually increase the effectiveness of the team by seeking additional training and technology resources in order to advance their ability to achieve these goals going into the future.
